PROJECTS

Book-IT - ReactJS E-commerce book Application [🔗](#)

- Book-IT is a React web application that allows users to buy books online. Users may search for a book by title, put it in their shopping basket, and then purchase it using a demo credit card transaction through this book store.
- ReactJS used for Front-end and CommerceJS for Back-end which provides backend eCommerce APIs for any frontend framework

ChatApp - Android/iOS chatting app [🔗](#)

- Created with React Native as frontend and Google Firebase as backend with email authentication
- ChatApp is a react native application with firebase as a backend where registered users can create rooms and chat with each other

Portfolio Website [🔗](#)

- This website is an opportunity to demonstrate a portfolio of information about me and to provide further information (via links) about my work
